FOR IMMEDIATE RELEASE

AETIS Appoints Miguel Gomez as First Secretary General

Brussels, 16 June 2026 – AETIS, the Association of European Tolling and Interoperability Service Providers, today announced the appointment of Miguel Gomez as its first Secretary General.

The creation of the Secretary General role marks an important milestone in AETIS' development as it continues to strengthen its role as the voice of the European electronic tolling and interoperable mobility services sector.

Miguel brings more than 20 years of experience across the tolling, mobility and transport technology sectors. A recognised expert in the European Electronic Toll Service (EETS), he has contributed to the delivery of major transport technology projects across Europe and supported several pan-European EETS certifications, including three of the six EETS certifications in Germany.

Miguel has also advised the European Commission's Directorate-General for Mobility and Transport (DG MOVE), giving him extensive experience at the intersection of industry, technology and policy.

Felix Wex, President of AETIS, said:

"The appointment of our first Secretary General marks a new chapter for AETIS. As our sector continues to evolve, it is increasingly important that we have the capacity to represent members eUectively, engage constructively with policymakers and contribute practical expertise to discussions shaping the future of mobility in Europe. Miguel's experience and knowledge make him exceptionally well placed to support this mission."

Commenting on his appointment, Miguel Gomez said:

"Efficient, well-connected transport networks are key to moving goods and services across Europe. Electronic tolling supports smoother mobility and reduces complexity. In my role, I will work to connect stakeholders and improve coordination across the system for the benefit of European citizens."

About AETIS

AETIS (Association of European Tolling and Interoperability Service Providers) represents companies delivering electronic tolling and interoperability services across Europe. The association works to promote the effective implementation of the European Electronic Toll Service (EETS), support interoperable mobility solutions and contribute industry expertise to European policy discussions, helping to advance a more connected, efficient and user-friendly transport ecosystem.
